/Nicholas D Lucchesi/ Supervisory Patent Examiner, Art Unit 3763								

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's argument with respect to the pending claims is not found to be persuasive. Examiner asserts the reference of Wright (USPN 5, 135,484) discloses a guide lumen (54) for placement of a guide wire (see Fig. 3) and col. 4, lines 184.9" ageneral central lumen 54 for receiving and following guide wire 56".

Wright discloses that the guide lumen 54 communicates with passage 70 to permit blood flow to bypass the portion of the vessel being treated. See col. 4, lines 41-47: "The catheter may also define a passage 70 which communicates proximally of the proximal balloon with the vessel and, through ... the lumen 54 ... distally of the distal balloon 48 thereby permitting blood flow to by-pass the portion of the vessel being treated." As best understood by Examiner, fluid intended for bypass would enter the passage 70, be directed to the lumen 54 and flow through the lumen 54 unit exiting at the distall end of the catheter.

Therefore, it is Examiner's assertion that the guide lumen is contemplated by Wright to be the same as the bypass lumen.
